TOOTHACHE. - Dr. Henry T. Reynolds, of Baltimore, writes to the editor of the Medical News, that for eighteen months he has been using acetate of lead (sugar of lead) as a remedy for toothache. He finds it better than any of the numerous remedies proposed in the books, and, in cases in which it is applicable, the relief is instantaneous. He advises the sufferer to apply from one to three grains to cavity for a moment or two, then spit it out. It fails in fewer cases than any remedy that Dr. Rey no'ds ever tried, not more than eight per cent.

Sir Frederick Pollock, late Lord Chief Baron of the English Court of Exchequer, died a few weeks ago, full of years and honors. He had just completed his eighty seventh year when the silver cord frayed into a thread by the la-bors of a long life, gently broke, or rather was insensibly loosed. No better illustration than that which he presented, could be given of the difference existing between men who wear out. and men who rust out.

EXCELSIOR is composed of 700 pounds of No. 1 Peruvian Guano, and 1300 pounds of Soluble Phosphate of Lime (bones dissolved in sulphuric acid,) potash and soda, forming the most concentrated, universal and durable fertilizer ever effered to the farmer-combining all the stimulating properties of Peruvian Guano, and the ever durable fertilizing properties of Ground Bones—supplying an abundance of Am-monia for any crop, and all soils, and in a per-tectly fixed condition—not volatile and passing off with the first crop, as with Peruvian and other ammoniacal guanos, but stimulating the crop to which is is applied, and all succeeding ones, giving to poor, worn out and unproductive soils new life and vigor, making them, in this respect, equal to the most highly cultivated lands, upon which much time and money have been expanded

have beer expended. EXCELSIOR was introduced in 1858, and we challenge the manufacturers and venders of fer-tilizers, natural or artificial Guano, to show results so invariably successful as can be shown from its use. One of the PROPRIETORS SUPERINTENDS IN PERSON EVERY MINUTE OF ITS MANUFACTURE, and therefore warrant every bag uniform, and to contain by analysis the standard of fertilizing proper-ties, giving that protection to the farmer which he does not have in the purchase of any other

Guano or Fertilizer sold. Excelsior is in fine dry powder, prepared expressly for drilling, and can be applied in any quantity per acre, however small; and it is the opinion of the most prominent and calculating farmers, after TWELVE years' experience in testing it side by side with other popular fertilizers, that an application of 100 pounds of Exsior is equal to 200 to 300 pounds of any other Fertilizer or Guano offered for sale, and therefore is fully 100 to 200 per cent cheaper.

The very best evidence we can offer of the value of Excelsior as a crop grower and fertilizer, is the fact of its being imitated and counterfeited. Some unprincipled manufacturers have actually used the trade mark for the purpose of palming off their worthless com-
